OBJECTIVE

Java Full Stack Developer with hands-on experience in Java, Spring Boot, React.js, MySQL, REST APIs, JPA/Hibernate, and Spring Security. Seeking an opportunity to develop scalable web applications, implement backend and frontend solutions, and contribute to software development projects.

Education

B.Tech in Electronics and Telecommunication Engineering

Yeshwantrao Chavan College of Engineering, Nagpur (2025)

CGPA: 7.8

Diploma in Mechanical Engineering

Government Polytechnic, Solapur (2020)

78.10%

SSC

Maharashtra State Board (2017)

87.20%

Skills Summary

- **Programming Languages:** Core Java, JavaScript (ES6+)
 - **Frameworks:** Spring, Spring MVC, Spring Boot, JPA, React
 - **Web Technologies:** Servlet, JSP, HTML5, CSS3, Bootstrap, REST APIs
 - **Databases:** MySQL
 - **Tools / Platforms:** Git, GitHub, VS Code, Postman
 - **Core Concepts:** OOP, Collections Framework, Exception Handling, Multithreading, JDBC
-

Internship Experience

Java Full Stack Developer Intern

Jan 2025 – May 2025

Creazione Softwares, Pune

- Developed web applications using Java, Spring Boot, JSP, and MySQL.
 - Implemented CRUD operations and database integration using JDBC/JPA.
 - Worked with REST APIs and participated in debugging and testing.
 - Collaborated with team members using Git and GitHub.
-

Projects

1) Employee Attendance And Payroll Management System

- Developed a full-stack HRMS and Payroll Management System using Spring Boot, Spring Security, JWT, React.js, and MySQL, implementing employee, attendance, leave, payroll, and admin modules with role-based access control and BCrypt authentication.
- Built REST APIs and backend business logic using Spring Boot, JPA/Hibernate, and MySQL for attendance tracking, leave/LOP calculation, payroll processing, holidays, salary components, overtime, search, and pagination.
- Integrated Google Gemini AI to develop an AI-powered HR Manager Assistant that handles natural-language queries related to attendance, leave, payroll, holidays, and HR processes through a React chatbot and Spring Boot REST API.

2) Property Rent Estimation Model

Live Demo

- Developed a full-stack web application to predict fair rental prices across Indian cities using a custom ML engine built in Pure Java. Implemented authentication with BCrypt password hashing, role-based access control, session management, and OTP-based password reset.
 - Integrated Google Gemini AI chatbot and AJAX-based dynamic location selection, with an Admin Dashboard for user management, training-data CRUD, model retraining, and prediction history tracking.
-
